Homework 6 Write-up

My application takes Wall Street Journal API and it gives information of the article (author name, title, and brief description). It sorts by the information of article such as 'popular', 'latest', or 'top'. Then, depends on the sorted category ('latest', 'top', or 'popular'), it gives the information of the article. See the image below:

```
-----top-----
author: Samer Hamadeh, Adam Dinow
title: What you need to know about startup boards
description: Every company has a board of directors -- but few founders and entrepreneurs give the matter of board composition much thought. We'd like to offer some..
